**Subject:** RE: Status of Overdue Registration Review Drafts?

Hi Phil,

I wanted to update you on the status of some of RMIB1's deliverables and when you'll be seeing them.

1. Glyphosate ID – Sent yesterday to you, Angela Huskey, and Erin Koch (who have been helping us with work on the outstanding petition)
2. Imiprothrin PID – Team comments were due yesterday, so you should see this one today!
3. Dinotefuran PID – team comment is due COB today, so you can expect to see the draft for your review by Thursday.
4. Clothianadin/Thiamethoxam PID (both a.i.'s combined into one) – Team comment due COB Friday 12/13, you will see the draft by Tuesday, 12/17.

Please let me know if you have any questions or concerns.

-Marianne

**Subject:** Re: Status of Overdue Registration Review Drafts?

Hi Phil,

Formetanate has recently moved to Q2, and pyridaben will most likely follow that path as well.

The CRMs recently sent the neonics (Imi, Dino and clothi/thia) for team review and are working to incorporate comments asap to give you the cleanest documents possible. These are particularly complex decision documents, so we anticipated a lot of feedback from the team, and are doing the best we can with the limited remaining time before folks are out for the holidays. We really appreciate your patience.

Glyphosate was anticipated in Q2 and was moved up at upper management's request. We are also doing everything we can to complete that document and get it to you and the team.

We will follow up with additional information on Monday to give you a better sense of when you can expect each of these documents (over the next week).

Many thanks,  
Dana

It looks like the following registration review drafts are overdue from RMIB1. Please advise ASAP on their status and when I can expect to receive them for review.

All of them were due to come to me by 12/2 except for Pyridaben which was to be sent to me by 11/22.

Please excuse if my records aren't up-to-date and you've already sent me any of these.

Ex. 5 - DPP; ACP; AWP
